DISCLOSURE OF RELATIONSHIPS WITH A POTENTIAL FOR CONFLICT OF INTEREST

In order to enhance an atmosphere of open, critical discussion, participants in the Pharmacogenetics Research Network Steering Committee meetings, have voluntarily agreed to make oral disclosures of the significant financial, professional, and personal relationships that they and their key research associates have formed with pharmaceutical and biotechnology entities. These could have an appearance of a Conflict of Interest with the activities and goals of the Pharmacogenetics Research Network. "Significant financial interest" is used here in a broad sense to mean anything of current or potential monetary value. This includes but is not limited to:

A. Intellectual property rights (e.g., patents, copyrights and royalties from such rights).
B. Equity interests (e.g. stocks, stock options or other ownership interests that when aggregated for the Investigator and the Investigator's spouse and dependent children, exceeds $10,000 in fair market value or represents more than a five percent ownership interest in any single entity).
C. Remuneration from serving as an officer, director, trustee, partner or employee of a commercial enterprise.
D. Salary or other payments for services totaling over $5,000 within the preceding 12 months (e.g. consulting fees or honoraria from seminars, lectures, or teaching engagements sponsored by for-profit entities).
E. Other current or pending activities that you feel should be disclosed as a potential Conflict of Interest.

Please list each entity followed by a letter from the list (A-E) above identifying the kind of relationship.

(Example) **XYZ BiologicPharmaceutic Corporation** **B**

In addition to oral disclosures, these forms will be available for inspection by attendees during the Steering Committee Meetings. These forms will remain on file with the Knowledge Base group. It is assumed that all investigators have complied with the policies of their home institutions in regard to the Conflict of Interest reports required of NIH grantees (http://grants.nih.gov/grants/guide/1995/95.07.14/notice-objectivity-i007.html).
